

ROTATING TELEHANDLERS

Congested job sites, especially in growing urban areas, present unique challenges that must be met with highly versatile machines. Enter our all-new rotating telehandlers, which can lift, extend and continuously rotate 360 Degrees from a fixed position.

3-IN-1 CAPABILITIES

Along with material handling, these machines function as mobile elevating work platforms and rough-terrain cranes.

RANGE OF CAPACITIES

Our rotating telehandler lineup allows you to lift, elevate and hoist from 11,000 to 13,000-lbs.

10 SPECIALIZED ATTACHMENTS

FINELY TUNED BOOM CONTROLS WITH SOFT STOP AND STANDARD REMOTE BOOM CONTROL FEATURE

2-SPEED HYDROSTATIC TRANSMISSION

INCHING FEATURE ALLOWS FOR OPTIMAL BOOM SPEED WITHOUT SHIFTING TRANSMISSION INTO NEUTRAL

FRONT AND REAR INDEPENDENT, SCISSOR-STYLE OUTRIGGERS WITH AUTOMATIC LEVELING JACKS

360-DEGREE CONTINUOUS ROTATION

Full rotation of the upper frame allows for both horizontal and vertical lifting and placing.

OUR HIGHEST REACHING TELEHANDLER YET

The R11100 features a 97-ft lift height, which can eliminate the need to have cranes on site.

CONFIDENCE-INSPIRING TECHNOLOGY

Each model features automatic attachment recognition, a Load Management Information System (LMIS) and Load Stability Indicator (LSI).

CYLINDER- AND CHAIN-DRIVEN BOOMS TO SUPPORT HIGHER REACH AND GREATER LIFT CAPACITY

INTUITIVE OPERATOR INTERFACE WITH DUAL JOYSTICK PROPORTIONAL CONTROLS

STANDARD REVERSING CAMERA

FRAME LEVELING UP TO 6 DEGREES TO COMPENSATE FOR UNEVEN TERRAIN

MODELS R1370 / R1385 / R11100
